William W Thomasson, being duly sworn, says:

That he is The Publisher of the Newnan Times-Herald, a daily newspaper of general circulation, printed and published in Newnan, Coweta County, Georgia; that the publication, a copy of which is attached hereto, was published in the said newspaper on the following dates:

June 27, 2013, July 04, 2013, July 11, 2013, July 18, 2013

That said newspaper was regularly issued and circulated on those dates.

SIGNED:

The Publisher

Subscribed to and sworn to me this 18th day of July 2013.

Stacie Lea Kittle, Notary, Coweta County, Georgia

My commission expires: December 06, 2013

Development Engineering  
21 East Washington Street  
NEWNAN, GA 30263

Notice is hereby given in compliance with Georgia Code 22-2-109 and 32-3-5 that the Georgia Department of Transportation has approved the Location and Design of this project.

The date of location approval is June 13, 2013.

The projects are located in central Coweta County, southeast of the City of Newnan, within land district 2, and Land Lots 38, 39, 57, 58, 71 and 72. Project CSSTP-0007-00(694) begins at the proposed intersection with SR 16 (mile point 13.22) heading northward along a new location alignment ending at and tying into the existing intersection of Newnan Crossing Bypass and Turkey Creek Road for a total length of 1.6 miles.

Project CSSTP-0006-00(877) begins on SR16 just east of the intersection with US29/27Alt./SR14 at mile point 12.99, and advances eastward through the proposed intersection with the Southeast Newnan Bypass Extension, and terminates at the west end of the bridge over I-85 for a total length of 0.39 miles.

Project CSMSL-0006-00(293) begins on US29/27 Alt./SR14 just north of the interchange with I-85 (mile point 10.61). The project advances northward through the proposed reconfigured intersection with SR 16 and Pine Road, and terminates at mile point 11.23 for a total length of 0.62 miles.

CSSTP-0007-00(694):

The proposed Southeast Newnan Bypass Extension roadway section beginning at SR16 will consist of four (4), 12 ft. lanes with a raised 20 ft. median and rural 10 ft. shoulders. From the intersection with SR16, the Southeast Newnan Bypass advances north to a crossing with existing East Gordon Road. A portion of East Gordon Road will be reconstructed to tie into the Southeast Newnan Bypass. From the new intersection at East Gordon Road, the Southeast Newnan Bypass continues northward across undeveloped properties and over Turkey Creek and Turkey Creek Tributary. Just prior to bridging over the Central of Georgia Railroad, the proposed section of median of the widens to a 44 ft. After bridging over the Central of Georgia Railroad, the proposed roadway descends back to grade to tie-in at the existing intersection of Turkey Creek Road and Newnan Crossing Bypass.

CSST-0006-00(877):

The propose roadway section at the beginning of the project just to the east of the intersection with US29/27Alt./SR14 will match with the four (4), 12 ft. lanes, flush median and rural 10 ft. shoulders as proposed in project CSMSL-0006-00(293). The proposed section will advance easterly along SR 16 to the proposed intersection with the Southeast Extension of the Newnan Bypass at which point the outside lanes will drop off and the proposed roadway section will become two (2) lanes with a flush median. Beyond the intersection the flush median will taper off and the roadway section will become two (2) lanes that tie-in to the existing section before the beginning of the bridge over I-85.

CSMSL-0006-00(293):

The proposed roadway section beginning on US29/27Alt./SR14 ties into the existing four (4), 12 ft. lane section just north of the I-85 interchange (41). Moving northward the median transitions to a variable width flush median before finally transitioning to a fixed 12 ft. flush median width. The intersection with SR 16 will be reconfigured to create a four (4) leg intersection by relocating the intersection with Pine Road to the south to tie-in directly across from SR16. The reconfigured intersection is proposed to be signal controlled. The proposed four (4) lane section of US29/27Alt./SR14 carries through the intersection northward at which point the roadway begins to transition down to match the existing two lane roadway section. At the intersection, SR16 proposes to have six (6), 12 ft. lanes including two (2) east bound through lanes, two (2) left turn lanes on to southbound US29/27 Alt./SR14, one (1) west bound through lane, and one (1) right turn lane. Moving easterly from the intersection the SR16 roadway section will transition to the four (4), 12 ft. lane, flush

median and rural shoulders section to match with the proposed project CSSTP-0006-00(877). The proposed section of Pine Road will remain two (2), 12 ft. lanes and both rural and urban shoulders to be used at various locations to minimize right of way impacts.

Drawings or maps or plats of the proposed projects, as approved are on file and available for public inspection at the Georgia Department of Transportation:

David Neighbors, LaGrange Acting Area Engineer

dneighbors@dot.ga.gov
