NOTICE OF LOCATION AND DESIGN APPROVAL
CSHPP-0007-00(613) DEKALB COUNTY

++P. I. NUMBER 0007613++
Notice is hereby given in compliance with Georgia Code 22-2-109 and 32-3-5 that the Georgia Department of Transportation has approved the Location and Design of this project.
The date of location and design approval is: **June 30, 2016**

intersections, improved MARTA bus stop access, articulated pedestrian cross walks and mast arm lighting will be incorporated into this project.
E. Ponce De Leon Avenue
E. Ponce De Leon Avenue is planned to include a short landscaped median at the approach to I-285 while maintaining a three lane section. Sidewalks will be enhanced and landscape planting will be added between I-285 and Mell Avenue between N. Indian Creek Road and Market Street, sidewalk and landscape improvements will be added to the north side of the roadway. Decorative fencing is planned along the entire length of the railroad ROW along the south side of E. Ponce De Leon Avenue.

Market Street
Market Street east of the CSX railroad (added) is planned to include a lane reduction to three lanes, this will allow for the addition of a dedicated 8' cycle track on the south side of the road. The cycle track will be separated by a 4' raised median. The north side of the roadway will include the addition of a 5' sidewalk. Bulb outs with pedestrian safety zones are planned at the intersections with E. Ponce De Leon Avenue, Vaughn Street and N. Indian Creek Road. Landscape planting is planned along both sides of Market Street. The intersection with N. Indian Creek Road is planned to include a bio-swale for storm water detention. An enhanced crosswalk is planned at the intersection crossing of the CSX railroad. A 10' sidewalk is planned at the railroad crossing on the south side only.

Rowland Street
Rowland Street is planned to maintain the two lane section. A 5' sidewalk is planned on the eastern side of the roadway and a 5' bicycle lane is planned on the western side of the road to function as a link from the current multi-use trail at the intersection with Norman Road to the proposed cycle track on Market Street. Milling and overlay of Rowland Street is planned to include replacement of broken granite header curbing with concrete header curb.

Norman Road
Norman Road is planned to maintain the two lane section with bicycle lanes along both sides of the roadway. Sidewalk is planned to be widened from 4 feet to 5 feet along the western side. Three "easeabouts" or small narrow landscaped medians are planned to slow traffic. Norman Road is planned for full depth pavement reclamation up to the dam. Milling and overlay is planned for the roadway located on top of the dam. A boardwalk parallel to the southern edge of the roadway and below the dam is planned to provide an accessible route to Milam Park and a relocated fishing pier. This project is proposed to be constructed in two phases. Clear and visible signage will be placed during construction to make nearby residents, business owners and customers aware of active construction, any detours and/or any closures.

Drawings of the proposed project, as approved, are on file and are available for public inspection at the Georgia Department of Transportation: City of Clarkston

NOTICE OF LOCATION AND DESIGN APPROVAL DEKALB COUNTY
++P.I. NO. 0009988++

Notice is hereby given in compliance with Georgia Code 22-2-109 and 32-3-5 that the Georgia Department of Transportation has approved the Location and Design of this project.
The date of location approval is August 5, 2016

This project is located at the intersection of SR 212/Browns Mill Road and CR 594/Salem Road in the city of Lithonia in DeKalb County in Land District # 16. SR 212/Browns Mill Road has a design speed of 45 mph and CR 594/Salem Road has a design speed 40 mph. The improvements along SR 212/Browns Mill Road are proposed to begin approximately 0.4 miles west of the intersection and to end approximately 0.2 miles east of the intersection. CR 594/Salem Road improvements are proposed to begin 0.1 miles south of the intersection and to end 0.1 miles north of the intersection. The proposed length of the project is approximately 0.6 miles.

Both SR 212 and CR 594 propose single 12-ft travel lanes in each direction with 10-ft to 16-ft wide urban border areas that include sidewalks that vary from 5-ft to 10-ft in width. These travel lanes would transition to two 12-ft lanes as they approach the roundabout and would transition back to single lanes after exiting. 4-ft bike lanes would be on each approach, but would not continue through the roundabout. The proposed roundabout has an inscribed circle diameter of 190 feet and includes a 12-ft truck apron along with 14-ft to 19-ft curbside lanes. Splitter Islands with pedestrian crosswalks, lighting, and landscaping will also be provided at and around the roundabout. Outside the roundabout, the roadways as proposed include a raised median that varies in width from 0-ft to 35-ft.

Drawings or maps or plats of the proposed project, as approved, are on file and are available for public inspection at the Georgia Department of Transportation:

Major Spill Notice: 3540 Buford Hwy NE, Brookhaven

On August 9, 2016, DeKalb County notified EPD and the public pursuant to EPD 391-3-6-.05 of a 23,280 gallon wastewater spill that occurred on August 5, 2016, at 10:18 hours, at **++3540 Buford Hwy NE, Brookhaven** into Tributary A to North Fork Peachtree Creek++. The spill was due to contractor Dave Under Ground Solutions bored through an 8" sewer main during connection of fiber optic cable; causing a spill. The problem was corrected at 20:00 hours, when a county crew assisted the contractor using the vactor truck to detain the spill, while the contractor repaired the 8" sewer main and restored normal flow.

330-389973 8/18WG
Major Spill Notice: 4347 Flat Shoals Parkway, Decatur

On August 9, 2016, DeKalb County notified EPD and the public pursuant to EPD 391-3-6-.05 of a 400 gallon wastewater spill that occurred on August 5, 2016, at 11:49 hours, at **++4347 Flat Shoals Parkway, Decatur++**. The spill was due to a sewage leaking from a creek crossing sewer line between manholes; causing a spill of approximately 400 gallons into South River. The problem was corrected at 14:06 hours, when the crew used concrete to seal the leak and restored normal service.
