OFFICE Program Delivery
DATE January 20, 2016

FROM Albert V. Shelby, III, State Program Delivery Engineer

Albert Shelby

TO Brent A. Story, State Design Policy Engineer
Attn: Dave Peters, State Conceptual Design Group Manager

SUBJECT Request for Detour Approval

Description and Project Proposal: The proposed project will replace a structurally deficient bridge on CR 464/Coleman Register Road over Lime Sink Creek utilizing a practical design where all work will remain within existing right of way, traffic will be detoured off-site during construction and construction accelerated using prefabricated elements.

Concept Approval Date: This is a Low Impact Bridge Project (LIBP). These projects do not require a concept report.

Reason a Detour is Required: The roadway will be closed to traffic while the bridge is being replaced.

Environmental Assessment of the Proposed Detour Route: The bridge being replaced is on a local road, and the off-site detour will continue to utilize local roads. Traffic will remain on the existing pavement, and no improvements are being made to the detour route. Therefore, the Office of Environmental Services did not evaluate and clear the detour route.

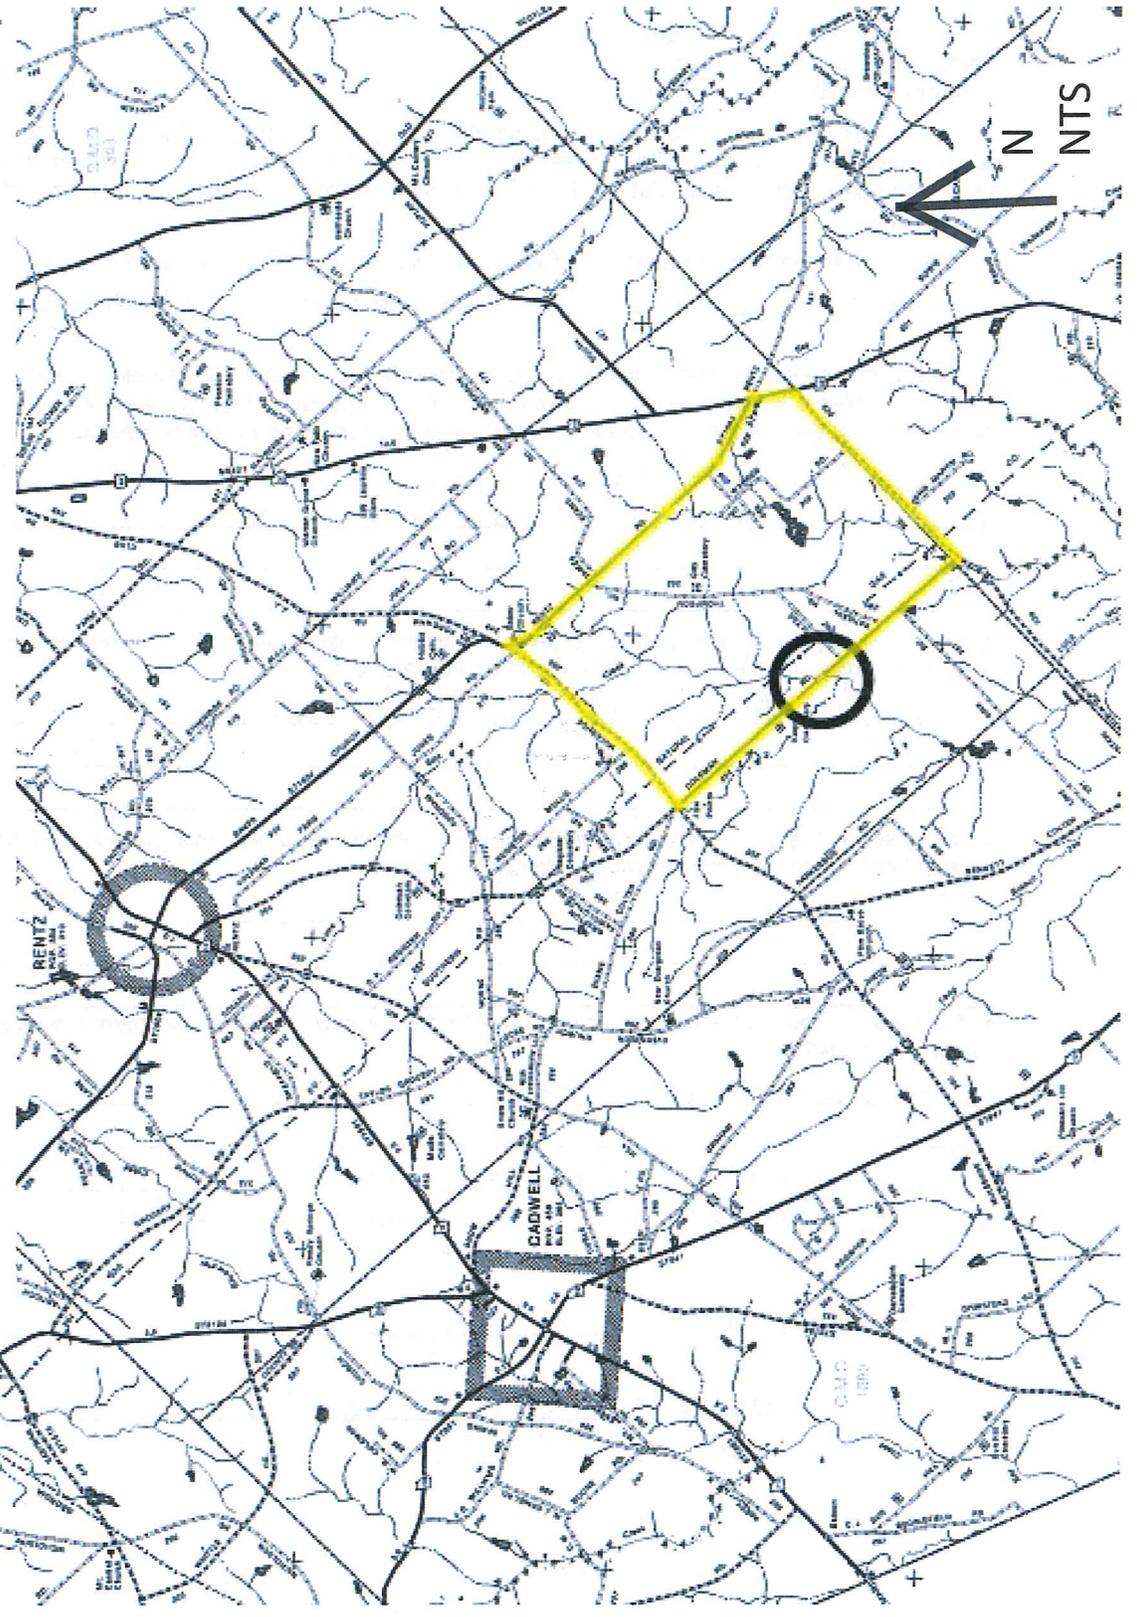

Temporary State Route Needed: No Yes Undetermined

Public Detour Meeting Results:

The use of detours is key to the timely delivery of these bridge replacement projects. Therefore, early coordination is required to assess support of a detour during the construction phase of the project. The Project Manager (PM) will solicit input from the local government, school system and emergency services. Official statements of support or opposition are attached. The public also will be notified of the proposed detour. Different strategies may be used for different locations; however, at a minimum, a Detour Report will be prepared and approved, and a Notice of Detour Approval will be published within 30 days of detour approval (once a week for four consecutive weeks in each county involved in the newspaper in which the Sheriff's advertisements are carried) in accordance with GDOT's Plan Development Process (PDP) and state law.

**Georgia Department of Transportation
Bridge Replacement Project
EMS and Fire Response Impact Form**

Using the attached project map, please respond to the questions below. Please provide as much information as you feel is necessary. Please respond to all questions – use "N/A" or "Non-known" if no relevant information to question is available. If additional information or mapping for this project is needed, please contact us.

1. Please rate the impact to Emergency Response services if the bridge were closed for up to a year.

- No Impact
- Low Impact
- Moderate Impact
- High Impact

2. If there are concerns please specify. Be as specific as possible. (examples: condition of detour routes, located in a high call volume area, closure could affect response to schools, weight restrictions, expected new development in the area, coordination with partner agency required to facilitate service)

Low to Moderate Call Volume More Access
For emergency vehicles having to detour

3. Are there any future time periods or events that you know of where bridge closure would be of particular concern? Please note the event and any details you are familiar with.

Coordinate with schools during school year

4. Is there anyone you feel we should contact specifically regarding this project? Please note their name, contact information, and reason we should contact them?

No

5. Are there any additional comments you have for this project? Are the road names referenced the names the locals would use?

Road names are good.

Give Notice of Closure Date in Advance
For Coordination of Emergency Services

Bridge Replacement Project
School Impact Form

Using the attached project map, please respond to the questions below. Please provide as much information as you feel is necessary. Please respond to all questions – use "N/A" or "Non-known" if no relevant information to question is available. If you need additional information or mapping for this project, please contact us.

1. How many School Buses crossings over this bridge are there per day?

Number of Buses 3 Number of Trips 6

2. Please rate the impact on service if the bridge were closed for up to a year?

No Concerns Moderate Concerns Major Concerns

3. If concerns were identified, please specify what they are below, be as specific as possible (Conditions of detour route, location of students, new development expected, weight restrictions, etc.)

We have 3 buses that travel down Coleman-Resister Road, but our map doesn't show the road going over Lime Sink Creek. If we loose this road, it will add several

4. Are there any future time periods or events that you know of where bridge closure would be of particular concern? Please note the event and any details you are familiar with.

School ends 5-21-14 for Summer break 3 bus routes
School Open back 8-7-14

5. Is there anyone you feel we should contact specifically regarding this project? Please note their name, phone number, and reason we should contact them?

N/A

6. Are there any additional comments you have regarding the project? Are the road names referenced the names the locals would use?

This would be Coleman-Resister Road

Using the attached project map, please respond to the questions below. Please provide as much information as you feel is necessary. Please respond to all questions – use "N/A" or "Non-known" if no relevant information to question is available. If you need additional information or mapping for this project, please contact us.

1. Please quantify the number of impacts anticipated by an off-site detour.

Daily Number of vehicles 75
Daily Number of Trucks 5
Number of Residences 4
Number of Businesses 0
Detour Length 3 miles

2. Please rate the impact on service if the bridge were closed for up to a year?

No Concerns Moderate Concerns Major Concerns

3. If concerns were identified, please specify what they are below, be as specific as possible (Conditions of detour route, location of students, new development expected, weight restrictions, etc.)

Detour route is a dirt road

4. Are there any future time periods or events that you know of where bridge closure would be of particular concern? Please note the event and any details you are familiar with.

None

5. Is there anyone you feel we should contact specifically regarding this project? Please note their name, phone number, and reason we should contact them?

~~N/A~~ N/A

6. Are there any additional comments you have regarding the project? Are the road names referenced the names the locals would use?

None know-

NOTICE OF DETOUR APPROVAL
BRZLB-0175-00(013), Laurens County
P. I. # 270725-

Notice is hereby given that the Georgia Department of Transportation has approved the use of and the routing of a detour for this project.

The date of detour approval is: February 5, 2016.

The proposed project will replace a structurally deficient bridge on CR 464/Coleman Register Road over Lime Sink Creek in Laurens County utilizing a practical design where all work will remain within existing right of way, traffic will be detoured off-site during construction and construction accelerated using prefabricated elements.

The proposed detour route would follow Fountain Road to SR 31 to Baker Church Road to 5 points Road and would be in place for 12 months while the bridge is being constructed.

Drawings or maps or plats of the proposed project, as approved, are on file and are available for public inspection at the Georgia Department of Transportation:
