TO Hal Rives, Commissioner

SUBJECT WIDEN AND RECONSTRUCT SR 52 - PROJECT CONCEPT REPORT

This project is the widening of a 0.50 mile(±) section of SR 52 from SR 52 Bus. to Co. Rd. 112 east of Dalton and the Dalton South Bypass. The existing road has an urban section with 4-12' lanes. The bridge over Mill Creek will be widened under Project BHF-082-1(25). Current and future traffic is 14,300 VPD (1991) and 23,200 VPD (2011).

The proposed project will widen existing road between above termini to provide an urban section with 5-12' lanes for thru movements and right turns/accel lane and a 14' lane for left turns. (See attached schematic lane diagram). Existing curb and gutter will be removed for the widening. Traffic will be maintained on existing road during construction. This project is part of the 1% Roads Program for Whitfield County and, as such, the Department will fund 100% of engineering, right-of-way and construction and the County will fund 100% of utility costs. The estimated cost of the project is:

	PROPOSED	APPROVED	LET DATE
Constr(Infl&E/C)	$640,000	$735,000	FY 90
Right-of-way	$235,000	$400,000	
Utilities	LGPA*	LGPA*	

*LGPA to be sent after project concept is approved.

I recommend that we approve this project concept report, that the project be removed from Preprogram Status and added to the Construction Work Program for implementation. A public hearing will be held.

SUBJECT **PROJECT CONCEPT REPORT**

We have reviewed the attached Concept Report for this ~~Minor~~ MAJOR project and have the following comment:

The Concept Report did not list a length of Project. This information should be included in all future submissions. (See typical sect. diagram)

We have received signed cover sheets from the following offices:

1. Traffic and Safety
2. Environmental

This report is satisfactory for approval subject to the above comment.

The estimated costs of this project are as follows:

Construction	$582,000
Inflation (5% per year)	---
E & C (10%)	58,200
Preliminary Engineering (5%)	29,100
Right of Way	235,000
Utilities	LGPA

DATE June 6, 1990

FROM Ron Colvin, P.E., State Traffic & Safety Engineer

TO Robert E. Humphrey, P.E., Project Review Engineer

SUBJECT **Project Concept Report Review**

We have reviewed the concept report on the above project for the proposed widening of S.R. 52/U.S. 76 from S.R. 52 Bus. to C.R. 112 east of the Dalton Bypass. The existing four lane urban section will be widened to provide for left and right turn lanes along S.R. 52 as well as at the bypass. We believe this concept will improve safety and operational capacity along this section of roadway, but we note the concept report shows a posted speed of 45 mph. and a design speed of 55 mph. If the 55 mph. design speed is to be achieved, the curb adjacent to the through lane should be offset shoulder width. With this, we find this report satisfactory for approval.
