TO Hal Rives, Commissioner

SUBJECT RECONSTRUCT CO. RD. 664/AIRPORT ROAD FROM SOUTH DALTON BYPASS TO COUNTY LINE - PROJECT CONCEPT REPORT

This project will reconstruct a 4.1(±) mile section of Co. Rd. 664/Airport Road southeast of Dalton from South Dalton Bypass to the County Line. The existing road has a rural section with 24' of pavement and 2'-4' shoulders. There are no major structures within the project limits. Current and future traffic is 4400 VPD (1994) and 8700 VPD (2014).

The proposed project consists of (1) improving the vertical and horizontal alignment between the above termini to current design standards; (2) resurfacing the existing pavement and (3) reconstructing the shoulders to an 8' width with the typical section to have 24' of pavement and 8' shoulders throughout. Traffic will be maintained on existing road during construction. This project is part of the 1% Roads Program for Whitfield County and, as such, the Department will fund 100% of engineering and construction costs and the County will fund 100% of right-of-way and utility costs. The estimated cost of the project is:

	PROPOSED		APPROVED		PROG. DATE
	Total	DOT Share	Total	DOT Share	
Const(Infl&E/C)	$1,331,000	100%	$300,000	100%	FY 92
Right-of-way	LGPA	0	LGPA	0	
Utilities	LGPA	0	LGPA	0	

I recommend that we approve this project concept report; that the project be removed from Preprogram Status and added to the Construction Work Program for implementation. Although this type project would be normally classified as a "Minor" project not requiring a public hearing, it is part of the improvement to Airport Road on which there are two other improvement projects, MR-1508(1) and SR-0556(7), which have a "Major" project classification with a public hearing required. Therefore I recommend that the subject project remain classified as a "Minor" Project but that it be included in the public hearing process along with the above two companion projects.

SUBJECT **PROJECT CONCEPT REPORT**

We have reviewed the attached Concept Report for this Minor project.

We have received signed cover sheets from the following offices:

1. Traffic and Safety
2. Environmental

This report is satisfactory for approval.

The estimated costs of this project are as follows:

Construction	$1,100,000
Inflation (5% per year) (2 yrs)	~~55,000~~ 110,000
E & C (10%)	~~115,500~~ 121,000 with
Preliminary Engineering (5%)	57,750
Right of Way	LGPA (Anticipated)
Utilities	LGPA (Anticipated)

OFFICE Atlanta, Ga.

DATE June 20, 1989

FROM Ron Colvin, P.E., State Traffic & Safety Engineer

TO Robert E. Humphrey, P.E., Project Review Engineer

SUBJECT **Project Concept Report Review**

We have reviewed the concept report on the above project for the reconstruction of County Road 664/S556 from the South Dalton Bypass to Whitfield County Line. Length of project is 4.1 miles approximately. Current and future ADT is 4420 (1994) and 8680 (2014).

The existing typical section consists of two 12 ft. lanes with 2 ft.- 4 ft. wide shoulders.

The proposed improvements will provide for two 12 ft. lanes; one lane in each direction, with 8' wide shoulders. Reconstruction of the existing roadway to improve alignment and shoulder widths will provide a safer roadway for the traveling public.

After conversation with Mr. Darby of the District Preconstruction Office, we are recommending to increase the shoulder width to at least 10 ft. because of high speeds and heavy truck traffic of 8%. With this, we would consider the concept satisfactory for approval.
